Admin Tools - Page Properties

- Updated the system to allow a Club Admin to be able to change a page's name.

Use Case: Previously, Clubs had to call Clubessential Support when they needed a page renamed. Now, in the event a Club wants to change a page Title from "Our Story" to "History", easily do so using this new feature.

Click [here](#) to see the Page Security and Page Properties tools in action.

Note: You must still contact Clubessential Support to rename the title for the following types of pages: calendars, online statements, and single sign-on URLs to third-party websites.
