Enhancements

Beacon Manager

- As an admin I can see the battery life of my beacons on the Beacon Manager.

Use Case: Previously, clients could not access this information without the help of Clubessential Support. With this enhancement, Clubs can review their Battery level any time they want from their Beacon Manager tool.

The screenshot shows the 'Manage Beacon Zones' interface. A table lists beacon zones with columns for Zone, Beacon, Beacon Range, and Battery Level. The 'Battery Level' column is highlighted with a red box and a red arrow pointing to it from the right. The table contains three rows of data.

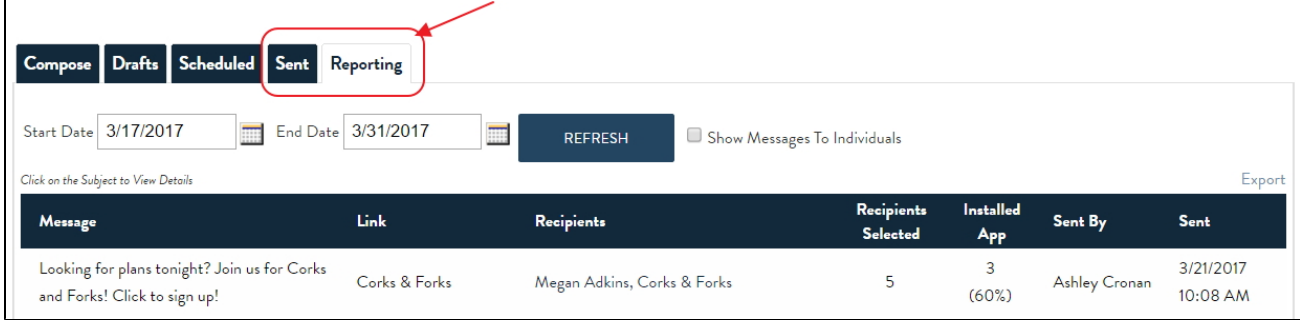

Zone	Beacon	Beacon Range	Battery Level
Zone 1	Front Gate [YCB-VR8H8]	10ft - 25ft	High
	Entrance [YTR9-Z67F3]	10ft - 25ft	High
Zone 2	Golf Shop [T44S-QY9CM]	5ft - 10ft	High

Push Notifications

- Added pagination to admin reporting tables in Push Notification Center.

Use Case: Previously, there was only one scrolling view to review push notifications sent to Club Members. Now, easily page through results to find desired information on the Sent tab and Reporting tab.

PUSH NOTIFICATIONS

Compose Drafts Scheduled **Sent** Reporting
