# Introduction

All reservation systems have **default email confirmations** to notify users when a reservation is **made, updated, or cancelled**. Default reservation emails can be easily customized to add your own personal message or personal imagery or logos. These notification emails are also a great way to cross market upcoming events or to share important news.

## Use Cases:

- **As an Admin, I would like my members to receive a copy of a confirmation of any changes made to their reservation(s).** Members will receive customized emails when making any changes to existing reservations as well as when creating new reservations. The content of the email is fully customizable through the site editor.
- **As an Admin, I would like to brand my notification emails with a logo and cross market upcoming events at the club via confirmation emails.** Admins are able to use the full resources of the editor tool by adding a personalized logo. Admins can also add flyers and/or links to cross market club events.
- **As a member, I would like to receive a confirmation email after making a reservation, changing a reservation, or cancelling a reservation.** Members will receive an email notification upon the instance of any changes made to current reservations, as well as confirmations.

# Video

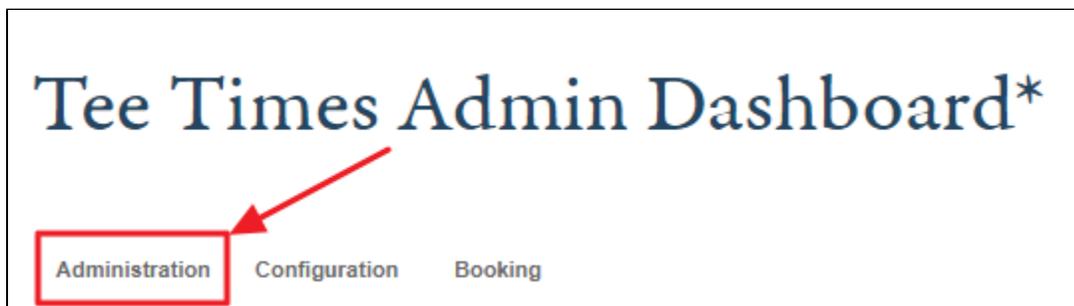

This video contains highlights from a training Webinar given on **Creating Booking Notifications**.

# Accessing the Tool

From the **Admin Dashboard** of any Reservations system, hover over **Administration**. Then, hover over **Notifications** and choose **Manage Notifications**.

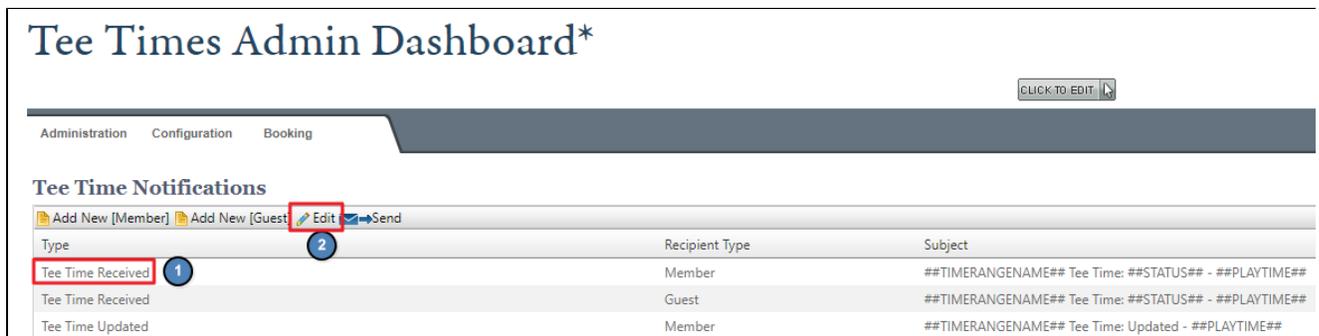

**Please Note:** The notification menu is accessible from any Reservations System. For the examples used in this guide, we are using the Tee Times dashboard. The other Reservation System notifications will use the same path and tools.

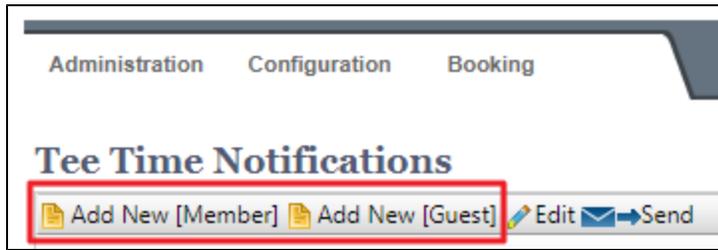

## Manage Notifications

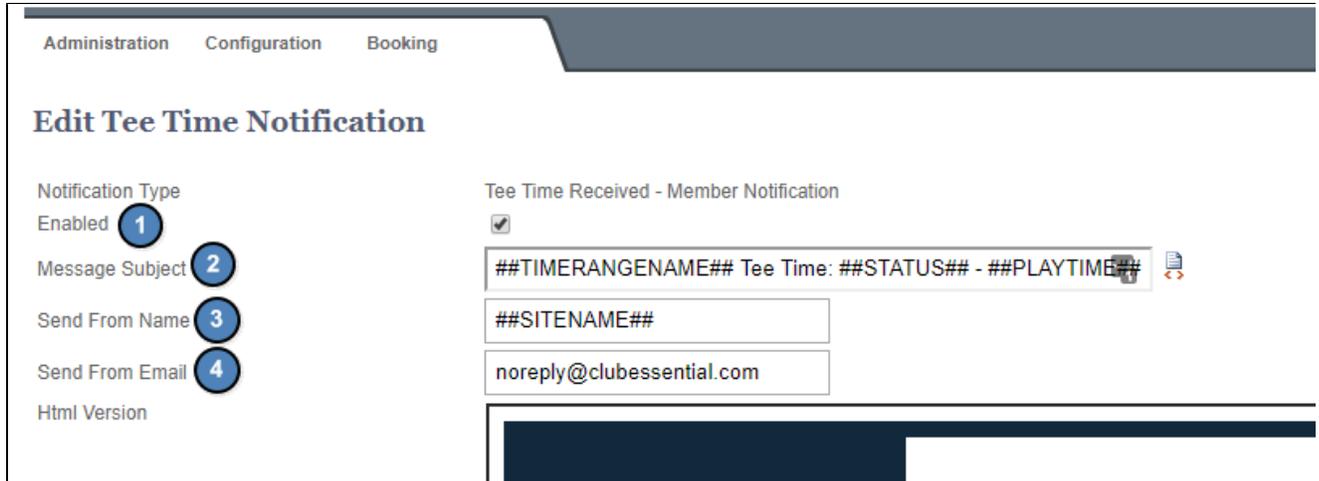

All **default** notifications set up within the system will show here. Users can edit the default notifications by clicking on the **Notification** and choosing **Edit**.

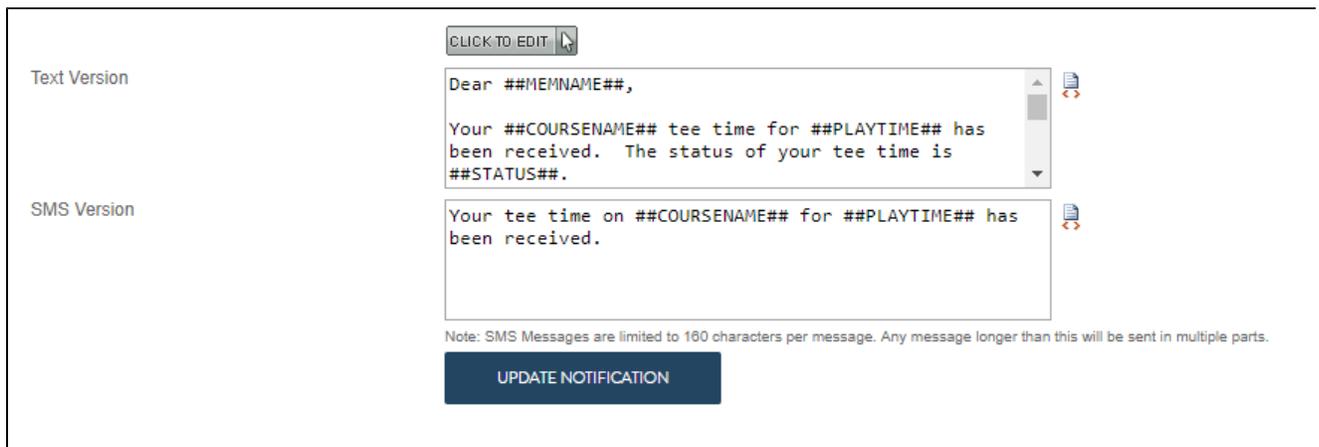

**Please Note:** Users can create additional emails to send to Members or Guests by using the **Add New** links as well.

The screen below will populate with options to **Enable** the notification, edit the **Subject**, edit the sent from **Snippet**, and edit the sent from **Email**.

Users will also have options to edit the HTML version, Text Only version, and SMS version. Click **update notification** to save the changes made within the notification.

## Snippets

Default messages are highly customizable using **snippets**. Snippets are special codes that pull in personalized member information and reservation details into the default message. Snippets are formatted with pound signs and should always be in all capital letters. The example below shows the Member Name snippet; **##MEMNAME##**.

Text Version

Dear ##MEMNAME##,  
  
 Your ##COURSENAME## tee time for ##PLAYTIME## has been received. The status of your tee time is ##STATUS##.

SMS Version

Your tee time on ##COURSENAME## for ##PLAYTIME## has been received.

Note: SMS Messages are limited to 160 characters per message. Any message longer than this will be sent in multiple parts.

When adding your own snippets or creating a new message, users can access snippets by clicking on **insert**, then **snippet**. Users will choose **Page Specific** to access snippets related to reservations. Click on the snippet to insert it into the body of the email. Some sample snippets are provided below.

X

To add a snippet to the Subject, Text, or SMS Version, cut and paste the Snippet value of the info you would like to show, and place it at the appropriate location in the textbox

Course Name	##COURSENAME##
Play Time	##PLAYTIME##
Start Tee	##STARTTEE##
Round Holes	##ROUND##
Party Size	##PARTYSIZE##
Comments	##COMMENTS##
Primary Player Name	##PRIMARYNAME##
Primary Player Email	##PRIMARYEMAIL##
Player Names	##PLAYERS##
Resources String	##RESOURCES##
Status	##STATUS##
Resources Tables	##RESOURCESTABLES##
Admin Notes	##NOTES##
Block Name	##BLOCKNAME##
Block Start Time	##BLOCKSTART##
Block End Time	##BLOCKEND##
Time Range Name	##TIMERANGENAME##
Time Range Start Time	##TIMERANGESTART##
Time Range End Time	##TIMERANGEEND##
Blocked Indicator	##BLOCKED##
Block Template ID	##BLOCK_TEMPLATE_ID##

## Send as Text Message/SMS

Below the email body you have the option of an added a text-only version of the message which is for anyone who may have opted out of HTML emails. This section will only contain plain text but you can still use snippets here to customize the message.

There is also an **SMS** version for any member that may have opted into receiving SMS communications from the club.

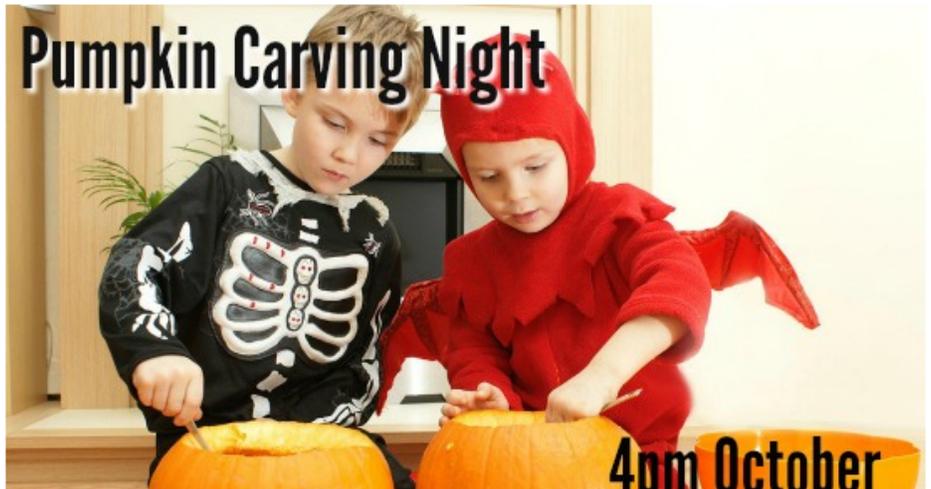

SMS Version	Your tee time on ##COURSENAME## for ##PLAYTIME## has been updated. 
Note: SMS Messages are limited to 160 characters per message. Any message longer than this will be sent in multiple parts.	

**Please Note:** The SMS notification is limited to only 160 characters so the message will need to be brief here.

## Cross Marketing

Email notifications allow the opportunity to increase your marketing power by showcasing upcoming events or maybe even a department specific sale. In the example below, the upcoming Pumpkin Carving Night event is showcased at the top of a Tee Time notification email. This ensures that all users will make some sort of contact with the event across various platforms.

### Edit Tee Time Notification

Notification Type	Custom - Member Notification
Message Subject	##TIMERANGENAME## Tee Time: ##STATUS## - ##PLAYTIME## 
Send From Name	##SITENAME##
Send From Email	noreply@clubessential.com
Html Version	

**Please Note:** It is important to note that once you start customizing this section - you will want to ensure that you update it again once the event or sale has ended.

## FAQs

**Q:** Do members need to sign up for text messaging or will they automatically receive notification messages?

**A:** For more information on how to set up Text Messaging and how to manage member accessibility, please see the [Text Messaging Guide](#).

## Best Practices

1. The SMS notification is limited to 160 characters, the message will need to brief here.
2. Users can create additional emails to send to Members or Guests by using the Add New links as well
3. When using Snippets, make sure they are always capitalized and use two pound signs before and after the snippet. Example: **##MEMNA  
ME##**.
