

CRM (4.17.17) Release

CRM - Release Notes

- Enhancements
 - Back-End Processing
- Bug Fixes
- Downloadable Guide

Enhancements

Back-End Processing

- Updated the CRM system to perform more optimized caching of data to dramatically improve performance.

Use Case: This behind the scenes functionality improves the data processing/updating times of CRM with the Clubessential Office product as well as other Clubessential systems.

Bug Fixes

- Fixed an issue with the My Documents pages not loading for certain customers.
