Enhancements

Locations

- **Added pricing, tax, and service charge customization to online ordering. Can be enabled/disabled and customized by location within online ordering.**

Use Case: Previously prices did not display when Members placed orders. Now, have the option to turn on pricing, taxes, and/or service charges to provide Members with a Total for the Online Order when they place the order.

Role Security

- Added role security group for online ordering so a club can give an employee admin access to online ordering without providing admin/editing access to other areas of the site.

Use Case: The Dining Manager will be assisting with setup and administration of the Online Ordering module, however, will not be involved in any of the other Website administration.
